

Phoooooo! Wow! Didjaseethat! ...and other exclamations of wonder....

ROBERT Wiseley worked for several weeks on this most special trophy, treasure, gem, beauty....call it whatever.. It's simply a beautiful outcome of skill, creativity and pride.

What bad luck that the Easter Show has been cancelled as this turning project of totara burr would, most certainly have impressed the judges.

**Fundraiser for a PEN TURNER'S
'EASYWOOD' - R2 Tungsten-tipped tool**

Picture on the left shows what the lucky winner will receive. A large block of ancient swamp kauri.

\$2 per ticket or three tickets for \$5

PS: the raffled has been sweetened with the addition of a second large block of similar swamp kauri

The winner takes it all!

RICHARD Melchert has completed the club's induction programme with a heap of success in each of the turning challenges,

The bowl in picture (left) shows great form and a smooth transition from rim- across the base-to rim.

Well done Richard, you have opened the door to many projects to come.

Goodonya!

AARON has a happy knack of getting the brightest shine on his turning projects.
...and here's another example of a mirror-like finish.

Great shape too!

Here's a special clock completed by **PAUL** using the Powerful "P" attributes.....

Patience

Persistence

Perseverance

Pride

A novel design that brings out the grain swirls to advantage and a top job with the plug cutting for the digits.

(Sorry, there will not be the usual free turning session on any working bee day)

A working bee will be held tomorrow morning

**Saturday 21st March
at the workshop**

9.00am to 12noon

Hope to see you there.

WORKING BEE Bring-alongs

- a trailer or two would be handy
- an electric chainsaw could be put to good use
- circlip pliers will be needed
- a couple of ice cream containers (for washing parts) please.
- tap and die set to fix a couple of things
- a ladder to reach the high places would be a good idea.

This TT might be the shortest one for quite a while. But no excuses offered here. The problem is my coming to terms with a completely new Microsoft programme and the learning curve has been quite steep.

Cheers

Clive
