2020 - Issue No 33 Friday 21st August 2020

Website: www.hwoodturners.org

Tutor: Clive Wilson 027 491 3868

WELCOME to our new club member **MALCOLM DOWNEY** who has made a great start to his induction programme.

Mission accomplished with turning a handle for his knockout bar.

“Rub the bevel. Rub the bevel. Rub the bevel”

Goodonya Malcolm

DENIS added a couple of enhancements to his deep turned bowl.

This project is a fine example of success with a texturing tool and also excellence in resin work

Careful sealing of the rim trench eliminated the chance of those pesky bubbles surfacing to spoil the work.

Look what I
found on the
Internet.

*AMAZON
Shopping*

HongWay

300 piece

Sanding Discs

Pad kit for drill
sanding

Some members have already shopped with AMAZON and scored goodies at reasonable prices.

The sanding discs shown above are available in a range of sizes – diameter and grit size

Keen? Check out the AMAZON website. PS: These are **not** the aluminium oxide disks.

YES, the workshop is open tomorrow (Saturday 22 August)

9.00 - 12 Noon

Duty Officer: Paul Wake

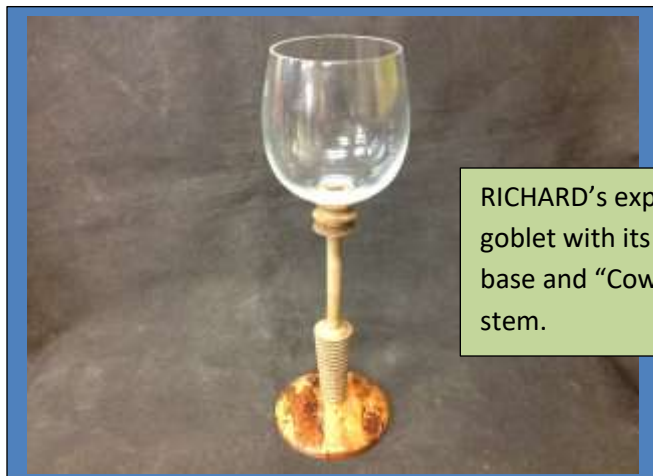

JOHN PARKER used three different woods to complete this clever project.

A strong fitting lid, a finial top and a super-smooth rounded pot base combine well in this natty art form.

Our **DAVID ROSE** found some Kohekohe wood to turn this project.

Note how David is able to transform the bark inclusions into an interesting feature in the turning.

Kohekohe is a medium-sized tree native to New Zealand. It is found in lowland and coastal forests throughout most of the North Island and also occurs in the Marlborough Sounds in the north of the South Island. Mature trees grow up to 15m in height, with a trunk up to a metre in diameter.

RICHARD's experimental goblet with its casuarina wood base and "Cow dung" stained stem.

This chestnut wood bowl is really special!

The maker SARAH, is a “newbie” turner who has made a flying start to wood turning.

A “Goodonya” gong for this one.

SASH CLAMPS

Do have access to one or more of these?

You do? OK bring them to next week's turning sessions for a special project involving wood veneers incorporated into bowl turning.

STEPHEN have-a-go-at- any challenge-**O'CONNOR** used oak wood to turn this exciting project - a three point arcing stand with a glass insert. Woo Hoo!

ALEX has made a smart fitting base for his large diameter candle lamp.

NATIONAL ASSOCIATION OF WOODWORKERS INC FUNDRAISING RAFFLE

1st Prize:

NOVA ORION LATHE
Valued at \$4399 - Sponsored by
CARBATEC & NOVA

2nd Prize: CARBATEC \$200

ready to help you on your winning way.**

**THURSDAY SEPTEMBER 3rd is
not far away and is the closure
date for the MORTAR and
PESTLE challenge.**

Started yours yet?

The WEDNESDAY evening turning team

It's celebration time with a shared supper.

Another 10-week course ended this week but an ongoing, fully subscribed course starts next week so not a lathe to spare. We sure are a keen and busy lot eh.

Members shared an opportunity to provide feedback about ideas for club ongoing improvements.

While the turning project range and quality has been a special feature throughout the whole membership, I wish to specially acknowledge the "Newbie" turners for the progress they made over the course of their 10-week induction programme. Heaps of potential obvious!

TWO PROJECTS from the lathe of DAVID COWLEY

A dinky Tassie blackwood bowl and an imitation birthday cake.

David has had fun with colour and inlays of resin.

Neil Joynt – wood turner and artist to visit.

Hamilton Woodturners Club is hosting the NAW (National Association of Woodworkers) Neil Joynt Tour in our workshop:

486 Whatawhata Road, Hamilton

On Saturday August 29th, 2020,

10.30 am till 4.00pm.

This is a Demonstrating day and all members are encouraged to come along. It doesn't matter how long or short you have been turning, you are sure to pick up ideas and learn from a very experienced and talented Turner.

Morning tea and BBQ lunch will be provided. Free to members of Hamilton Woodturners Club. \$5.00 to others

This is open to all members of our club and other wood crafting Groups in the Waikato and beyond.

The cost is \$40 for people who are National Association of Woodworkers (NAW) Members and \$85 for non-members of NAW. You can join on the day - plus raffles and Morning Tea & lunch if not members of HWC.

Consider becoming a member of NAW for the cost of ~~\$50.00~~ \$25.00 (50% discount) for just \$65.00 total get the benefits of been a member and attending the Demonstration day. Value!!!

Neil will be demonstrating the following three techniques at this workshop / class over the course of the day. **See below for further details:**

- **Turning a Thin wall pot and Pyrography;**
- **Turning a Lidded box with inlay.**
- **Jewellery for Markets**

Who is Neil?

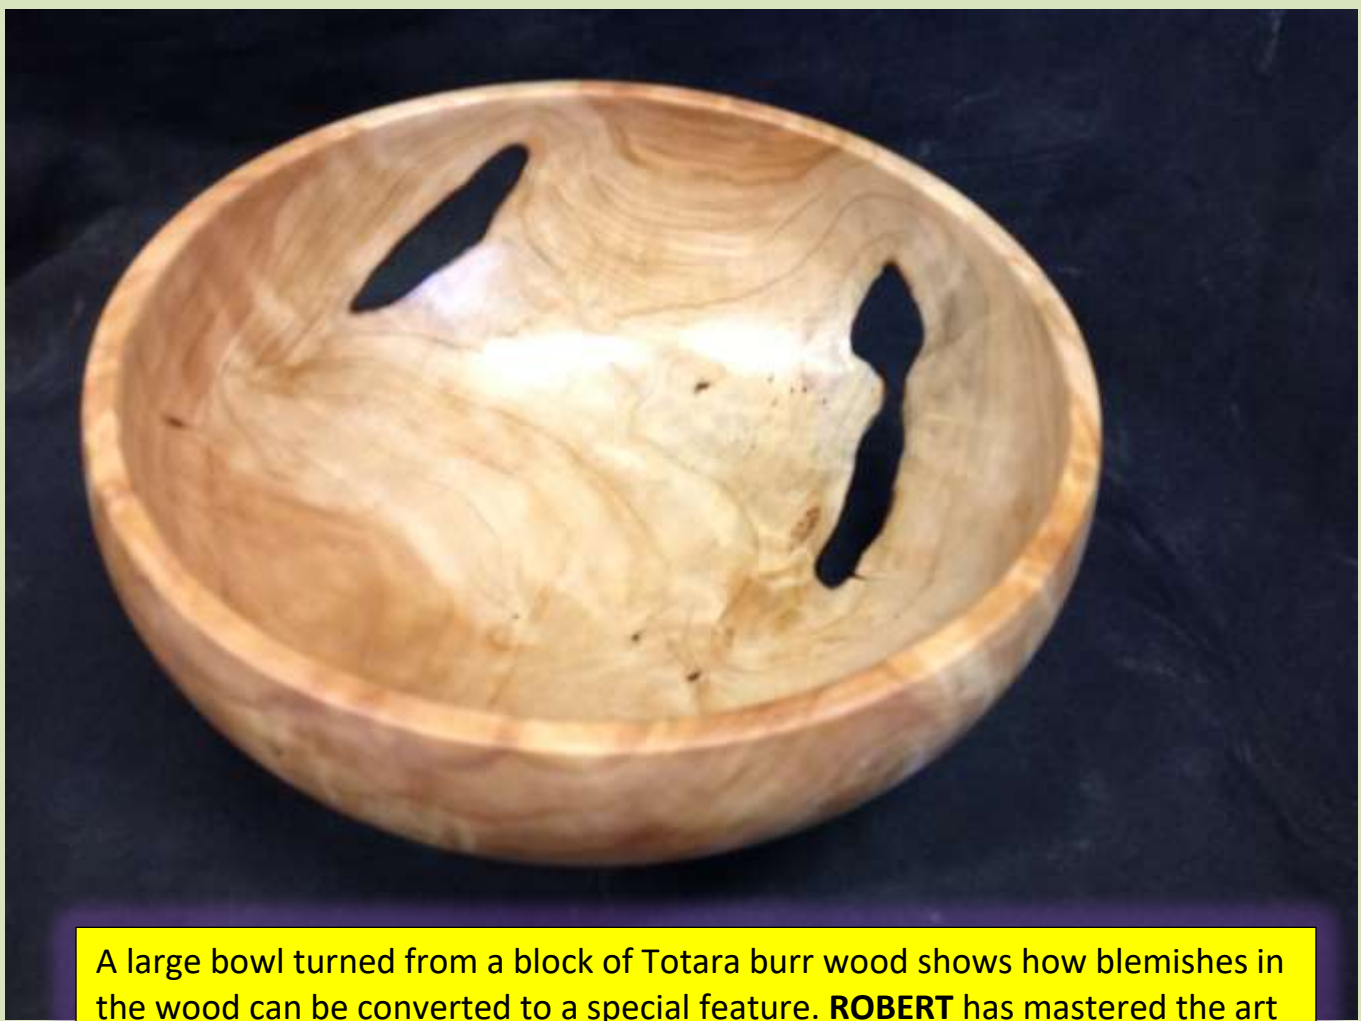

Neil Joynt has been woodturning off and on for 25 years. He is a self-taught wood artist living in a rural location in Tokoroa New Zealand. Prior to this interest in woodcraft Neil always had a creative bent. In his late teens he enjoyed making jewellery, working copper and brass. Today Neil works as a wood turner and artist. He is deeply inspired by the naturally occurring patterns of wood grain and the hidden beauty within each piece of timber. When not creating Neil is keen to demonstrate and teach his techniques to all who ask. Cheers, Murray

The THURSDAY Team

Yum.

It's a shared supper time to celebrate the turning achievements over the past 10 weeks. All members of the Thursday team have decided to continue with another course which begins next week.

A large bowl turned from a block of Totara burr wood shows how blemishes in the wood can be converted to a special feature. **ROBERT** has mastered the art of the continuous arc from rim to rim.

STEPHEN HAWLEY had a successful shot at using a dremel tool to add an interesting enhancement around the rim of a shallow bowl. A neat undercut and a great finish to the project.
