**TERRY SCOTT  
DEMONSTRATION  
DAY**

**(Read on...)**

**TOY PROJECT**

There's just 37 days to go before the deadline of December 9

## **THIS WEEK'S TOP TURNING**

**MALCOLM** Porteous made an excellent job of his pot complete with interesting enhancements.

## THIS WEEK'S COMPLETED PROJECTS

**BRIAN** used the long-reach chuck jaws very successfully for the first time to assist the turning of his London Plane curvy bowl.

**LEN**, who has now completed his second project, clearly has a great eye for shape.

He has been quick to adopt and apply the club's NEAGE approach to turning.

Next week we will talk about adding embellishments to add even more interest.

**JAN's** pen turning interest gets plenty of lathe time. These green and gold slimline pens were completed in quick time during Tuesday's session.

With these particular colours they could be destined for the Australian market eh.

**RICHARD** has been experimenting with a "home brewed" oil finish. (2 parts of X, three parts of Y and a dash of Z). Then this cunning concoction was applied to his cherry wood bowl. Wow! Look at the result.

**MALCOLM V** used a block of oak wood to turn his shallow bowl.

This turning is a good example where the quality bar has been raised.

Goodonya Malcolm.
