2020 - Issue No 40 Friday 9th October 2020

Website: www.hwoodturners.org

Tutor: Clive Wilson 027 491 3868

Wow! **MALCOLM PORTEOUS** has turned out another top quality project,

Tassie blackwood with 'sandwiched' veneers sliced from American walnut and English ash.

The colors and design are quite special.

The Wows continue.

DAVE FREW has been turning for just a short while and look at this super- dooper creation.

Inserts, veneers and plugs have been added to a Tassie blackwood bowl.

Great design and quite a challenge to put it altogether.

Goodonya Dave.

JAMES-the-diligent worked quietly throughout the entire Tuesday session then produced this gem Woodie.

Amazing what can be done when one's focus isn't interrupted eh.

STEPHEN O'CONNOR patiently prepared an array of segmented blocks then turned this large vase.

(lots of cutting angles and precision glue work needed)

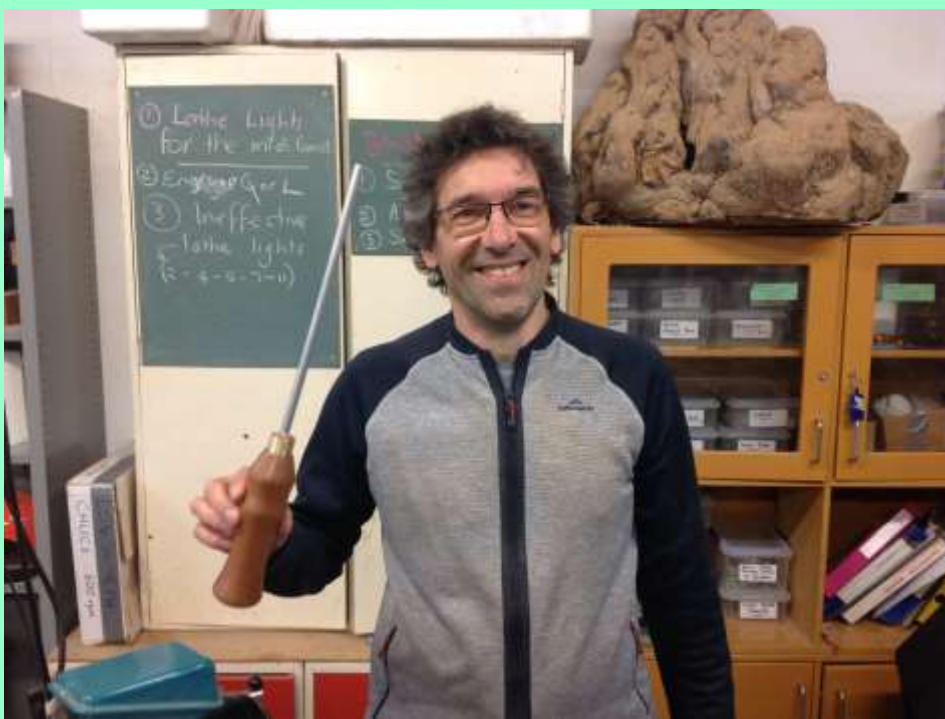

Stephen has created a very fine example of a well-planned wood turning project.

Saturday morning turning?

Due to the cancelation of the Neil Joynt demonstration the workshop is now available for members' use.

Tomorrow - Sat 10th October - 9.00am to -12 noon

Duty Officer: PAUL WAKE

Here's a big smile from new member **JON FEATHERSTONE** who has completed his first turning project.

The 'knockout bar' module opens the door to several essential wood turning skills, several of which are repeated in upcoming projects.

A really great start Jon!

Here's another quality turning project from **CONAN**.

A special feature of this work is the superb finish achieved through careful "bevel-rub" cutting and correct sanding procedures.

CHRISTMAS is only 77 days away

NOTE: The NEIL JOYNT demonstration day that was scheduled for tomorrow, Saturday 10th October, has been **CANCELLED**

This is **RICHARD JACKSON's** turning project which has become a suspended overhead light.

The bulb has been fitted to an attractive thin-walled bowl turning.

See, only two hands can make light work.

A very smart Rewarewa wood **CANDLE HOLDER** turned on the lathe of **MALCOLM VAILE**.

The grooves were cut using a very thin parting tool.

The **WHEREABOUTS** of: Clive's wooden-rail Sash Clamps used for gluing veneer projects.

These were borrowed by one of our members and now need to be returned to the workshop please.

ADVANCE PLANNING *(yet to be ratified by the committee)*

CALENDAR dates for your diaries

Tuesday group	FINAL session for the year	December 1st
Wednesday group	FINAL session for the year	December 2nd
Thursday group	FINAL session for the year	December 3rd
THIS YEAR'S ANNUAL CHRISTMAS FUNCTION		Sunday December 6th
		Venue: to be decided

2021 RESTART dates

Tuesday group	FIRST session for the year	February	9th
Wednesday group	FIRST session for the year	February	10th
Thursday group	FIRST session for the year	February	11th

A silky smooth finish has been applied to **SPENCER's** shallow Tassie blackwood bowl. What a great idea for a snazzy Christmas gift. Goodonya!

Our **ROSS** produced this tulip wood gem in a very short time. Confidence begets competence and competence produces the woodie goods. Goodonya too!
