Tutor: Clive Wilson 027 491 3868

Omigollygosh!

Look at this week's offering from **MICHAEL DOYLE.**

Segments there, segments here, segments everywhere!

A quality turning indeed.

Well done Michael.

On Tuesday of this past week we hosted a group of ten elderly folk from the **EVLIVEN – Maximizing Independence organization.** After a shared morning tea our visitors mixed and mingled with club members observing and chatting about woodturning. Here's our JOHN telling the visitors all about the happenings of our club.

CAELAN used a block of silver pine wood to turn out this very smart bowl . This project shows that Caelan is getting very close to achieving a continuous arc from rim to rim.

WE look forward to Caelan's special demonstration scheduled for next week.

Two images of **DAVID Mollekin's** screw-on lid box.

This was a first-ever member achievement for a threaded lid attachment.

The thread was made by using a Sorby thread chasing set (20 TPI)

Have a go! (but get some help from David)

Saturday morning turning? YES!

The workshop will be available for members' use.

Tomorrow - Sat 24th October - 9.00am to -12 noon

Duty Officer: JOHN BAKER

MALCOLM Downey made an excellent job of his Chestnut wood bowl.

DAVID Mollekin used radiata pine to have some fun with a salt shaker

SARAH has made rapid progress understanding the general procedure for pen making.

This one was put together in record time.
Precision fitting too!

CAELAN's Redwood bowl has a curious white spot on the wall of the bowl/
What is it? How did it get there?
(All will be revealed at next week's demo)

Our CHRISTMAS function – Sunday 6th December

In past years we have held our CHRISTMAS function at the home of generous hosts.
We are hoping to continue this idea and are calling for someone willing to host the event.

If you can assist please call Andre` our president. Phone No: 021 209 4992

63 Days until CHRISTMAS

WORKING BEE

Note to all club members

A working bee has been scheduled
for **Saturday 31st October**

9.00 am to 12 noon.

There's much to be done so many
hands will be needed

JON brought his son ZEB to
the Wednesday session and
handed him a few turning
tools to complete a project.

Result: A showpiece garden
dibber that is so flash that it
will probably never see the
garden.

Hey ZEB, we would be
pleased to have you as a
full-time club member.

SPECIAL NOTICE (in case you missed the first notice)

A WORKING BEE has been scheduled for SATURDAY 31st October
starting at 9.00 am

Many thank yous to **ROBERT WISELEY** for his donation of several pieces of ready-to-use assorted timber blocks.

COLIN found a few blocks of poplar wood amongst his stockpiled lot and these too are now available for members.

Our **GARY** keeps them coming. So this time we have an oak wood bowl and a swamp kauri “dinky” bowl. Both items have been finished to a high standard.

GRAEME used New Zealand oak to turn his nifty eggshellent (.....just yolking) egg and cup.

AARON reckons he was just “mucking around” and whipped out these two mini bowls. Tassie blackwood and pin oak woods used here. Cor!
