Last weeks Saturday Toy Making got off to a fine start with several toys completed and a number in production. There is now a TOY BOX in the club for you to deposit your toys, so keep them coming. We will have another day in the future.

Check out the Future Focus section at the end of this newsletter for upcoming events. The Waikato Guild has two events coming up at their clubrooms in Storey Ave which will be well worth attending.

Don has managed to produce this great octagonal bowl from Cherry, with a little help from his friends. Inside diameter is 220mm and finished with Shellawax Glow

Bill is still busy. This hollow form is made from Liquid Amber with a Matai insert. 180Mm dia.

Two views of one of Garths creations. Great finishing work on these.

Christines first bowl, made from London Plane. This bowl has gone to Australia as a gift.

Greg has a secret supply of Bowling Balls. Some examples of what he is achieving.

Alan has tried his hand at laminating The interesting feature wave is layers of veneer.

Another great lidded pot from Malcolm P. This one from Kauri

Small, cute and dinky - bay laurel bud vase finished with dremel, spirit dyes and poly. 160mm.

Work in progress - pin oak vessels turned wet. In various stages of drying and warping and waiting for a suitable finish.

From Richard

From Colin. A twin bowl in Kauri

Again from Colin, this time in Juniper

## Lathe for Sale.

Contact Spencer in the first instance if interested

[spencer.c.heald@gmail.com](mailto:spencer.c.heald@gmail.com)

The Working Bee team, apparently hard at work

### For Extra Points

What speed should the lathe be turning at when using a 50mm forstner bit?

### Last weeks answer

**A centre with a crown of points is known as a STEB CENTRE**
